

GDBusProxyInterface

```
classDiagram
    class GDBusProxyInterface
    class BluezAdapter
    class SavedConnection
    class SavedConnections
    BluezAdapter --|> GDBusProxyInterface
    SavedConnection --|> GDBusProxyInterface
    SavedConnections --|> GDBusProxyInterface
```

The diagram illustrates a class hierarchy. At the top is the 'GDBusProxyInterface' box. Below it, three boxes are arranged horizontally: 'BluezAdapter', 'SavedConnection', and 'SavedConnections'. A horizontal line connects the three bottom boxes, with a vertical line extending upwards from the center of this line to the bottom of the 'GDBusProxyInterface' box, ending in an arrowhead. To the left of the 'BluezAdapter' box, a vertical ellipsis (three dots) is positioned between the horizontal line and the box's top edge.
